

### Legend

|  |
|--|
| C = Certified by vendor with backup documentation. IMSS may not test.  |
| S = Supported by vendor, although they may not test every release. IMSS may not test.  |
| T = Tested by IMSS and it appears to work. May not be supported by vendor.   |
| X = Not tested, but expected to work.  |
| Asterisk (*) = IMSS Recommended.   |
| NS = Not supported by vendor or by IMSS.   |
| NO = Tested and does not appear to work or not supported by vendor.  |
| N/A = Not Available.   |
| Yellow Cell = Coming soon or under evaluation. Items marked <b>On-Hold</b> are those applications where a new version is expected soon or the Help Desk plans to roll out a new browser version to the managed computers.  |
| <b>HD</b> = Contact Help Desk for possible work-around.  |
| No Color (White) = Only tested on an as needed basis or when troubleshooting.  |
| <b>Black Cell</b> = Consider these NOT required by end users with no plans to test.  |
| Blue Cell = Web applications that do not use access.caltech login credentials. They are neither single nor common sign-on applications. Although your passwords may be similar, they are not sync'd with access.caltech or may not require (e.g. Finance Queries) login credentials. |

### Foot Notes

|   |
|---|
| [1] For Oracle Web Apps with IE, you must have pop-ups open in new window, not tab.   |
| [2] Allow pop-ups, otherwise this application will not work.  |
| [3] Add web site to local intranet to allow downloads for trusted web sites. See the Security area of your browser.   |
| [4] For IE, may need to use Compatibility View mode.  |
| [5] For Firefox on Mac, we only test one OSX version. Others are assumed to behave similarly.   |
| [6] Some Oracle products may not work with Firefox 38 & higher. For temporary work-around see <a href="http://imss.caltech.edu/content/oracle-issues-firefox-v37-and-newer">http://imss.caltech.edu/content/oracle-issues-firefox-v37-and-newer</a> |
| [7] Although Chrome & Edge are not officially supported by IMSS, some testing may occur. The Java add-on (JRE) is not supported by these browsers.  |
| [8] Footnote available.   |
| [9] Uses Oracle web-based (OA Framework/HTML) interface model, not the Oracle Forms/Java based model. Does not require the Java add-on.   |
| [10] For PIC with Firefox on XP, may need to refresh to see buttons at bottom.  |
| [11] Cannot access Analysis Studio in Firefox. Link is not available.   |
| [12] Requires config file (DeploymentRuleSet.jar) to suppress security warnings. See <a href="http://imss.caltech.edu/help/java-config-file">http://imss.caltech.edu/help/java-config-file</a>  |
| [13] Does not support Java plug-in.   |
| [Java] This application requires the Java plug-in, a.k.a. JRE. Java 8 tested and recommended.   |

### Other Notes

|  |
|--|
| -- For Windows 7, IMSS tests 64bit systems.  |
| -- Some vendors do not always keep up with Java or browser releases. Although some IMSS testing may occur, not all functionality is tested.  |
| -- Managed Computing means advancement to new browsers or OS version is controlled by IMSS Help Desk. Testing of these apps is coordinated with Help Desk.   |
| -- A config file is available to suppress unwanted security messages generated by Java. For more information see <a href="http://imss.caltech.edu/help/java-config-file">http://imss.caltech.edu/help/java-config-file</a> |
| -- OLM = Oracle Learning Management  |
| -- IE Compatibility View (CV) mode may be needed and in some cases must be used. See footnote 4 for applications requiring CV mode.  |
| -- Due to Windows XP end-of-life (April 2014), this OS is no longer being tested nor supported.  |
